EXPERIENCE

Currents AI • Founding Product Designer

Remote, United States // 2024 – Present

- Led the end-to-end design of an AI-powered platform enabling small e-commerce businesses to analyze and understand customer sentiments from social media feedback.
- Collaborated with engineers to refine NLP models for market analysis, leading to 2,000 users and 10+ paid subscribers within the first week.

T-Mobile • Product Designer

Bellevue, WA, United States // 2023 – Present

- Sole Lead Designer for the account management vertical, collaborating with 10+ stakeholders to redesign the account dashboard, resulting in 1,000 fewer customer support calls per month and enhanced users' self-service capabilities.
- Led the design of the Manage tab, a key tab of the TLife app's 5-tab structure, utilizing traffic analytics and user research to deliver data-driven designs that contributed to the app's ranking as the #1 Free Lifestyle app in the Apple App Store.

Indeed.com • UX Design Intern

Seattle, WA, United States // 2022

- Developed a system providing customized guidance to help users enhance their profiles and stand out in the job market.
- Collaborated with data scientists to ensure feasibility, led innovative design workshops, and conducted concept testing, yielded positive results.

University of Michigan Hospital • UX Research Intern

Ann Arbor, MI, United States // 2021 – 2022

- Streamlined surgical safety reporting by implementing research-driven recommendations, reducing data entry time for nurses. Employed methods including contextual inquiries, heuristic evaluations, and usability testing.

General Motors • Product Designer

Shanghai, China // 2019 – 2021

- Launched a chatbot on Buick vehicles, collaborating with engineering teams to overcome security challenges and enhance user experience.
- Redesigned the Fleet Service Platform, improving data visualization for vehicle inventory monitoring, increasing its revenue contribution to 50% of departmental earnings.
- Designed a dealer tool and its design system, enhancing customer service efficiency and expanding the user base from 20 to 3,000.

Adinnet Design Agency • UX Designer

Shanghai, China // 2018 – 2019

- Designed a cargo management tool for the world's second-largest ocean shipping company, enhancing tracking, cargo handling, and billing workflows.
